Art Unit: 1646

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 7, 30 and 31, drawn to a polypeptide, classified in class 530, subclass 350.
- II. Claims 8, 9, 11 to 24, 26, 32 and 33, drawn to an isolated nucleic acid, vector, host cell, and method of use, classified in class 435, subclass 69.1.
- III. Claims 10 and 25, drawn to an antibody, classified in class 530, subclass 388.22.
- IV. Claims 27 to 29, drawn to a binding assay, classified in class 435, subclass 7.21.
- V. Claims 34 and 35, drawn to a compound of unspecified constitution, classification undeterminable.

The inventions are distinct, each from the other because:

The polypeptide of invention I, the nucleic acid of invention II, the antibody of invention III and the compound of invention V are four chemically different compounds each of which can be made and used without the others. Distinctness is shown by the fact that these four different compounds lack a common utility which is based upon common structural feature disclosed as the basis for that common utility.

Inventions I and II are each related to invention IV as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the isolated protein on invention I and a

Art Unit: 1646

recombinant cell expressing that protein, as encompassed by invention II, are clearly materially different products which can be employed in the claimed process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
